

The Awareness Project: Risk & Manipulation-Focused Curriculum

SECTION 1: WHO YOU ARE & WHAT YOU HAVE

What attackers want from you

Module 1: Your Identity & Personal Information

- What makes you identifiable (name, phone, SSN, email, address)
- Why your information is valuable
- Identity theft and impersonation
- Synthetic identity fraud (fake you)
- Recovering when your identity is stolen
- Protecting your digital identity going forward

Module 2: Your Passwords & Account Access

- Weak passwords and how they're cracked
- Password reuse across accounts (the domino effect)
- Account takeover and what happens next
- Recovery options and their vulnerabilities
- Two-factor authentication—real protection or false security?
- Future attacks on biometric authentication

Module 3: Your Money & Financial Assets

- What's in your accounts and cards
- Bank accounts, credit cards, digital wallets
- Cryptocurrency and blockchain risks
- Access points and who can drain them
- Recovery and chargeback limitations
- When you cannot get your money back

Module 4: Your Location & Physical Safety

- Location data and what it reveals
- Real-time tracking by partners, stalkers, companies
- SIM swaps and phone number hijacking
- Emergency services and address exposure
- Protecting your physical location online
- When digital threats become physical

SECTION 2: SOCIAL ENGINEERING & MANIPULATION TACTICS

Exploiting human psychology to steal from you

Module 5: Authority, Urgency & Fear

- Authority bias and impersonation
- Creating fake urgency (limited time, immediate action)
- Fear-based manipulation (threats, warnings, consequences)
- Tech support scams and fake warnings
- Government and bank impersonation
- How to verify legitimacy before acting

Module 6: Trust, Social Proof & Reciprocity

- Building false trust over time
- Social proof (fake reviews, fake testimonials, fake popularity)
- Reciprocity manipulation (giving to get)
- Fake influencers and trusted figures
- Manufactured endorsements
- When recommendations are paid or fake

Module 7: Scarcity, Commitment & Consistency

- Artificial scarcity (limited inventory, limited time)
- Manufactured FOMO (fear of missing out)
- Commitment traps (initial small commitment leads to larger ones)
- Sunk cost fallacy (you've already invested, keep going)
- Building momentum toward the con
- Recognizing escalation patterns

Module 8: Romance, Relationships & Emotional Manipulation

- Catfishing and building fake personas
- Romantic scams and pig butchering
- Emotional attachment exploitation
- Trust-building over weeks or months
- Isolation from friends and family
- Financial exploitation through "love"
- Recognizing the relationship is fake

Module 9: Pretexting & Impersonation

- Creating fake backstories and identities
- Impersonating officials, support staff, colleagues
- Obtaining information through a false story

- Fake profiles and fake accounts
- Posing as family members in emergencies
- Physical and digital pretexting combined

Module 10: Baiting, Tailgating & Pressure

- Offering something free to compromise security
- Physical tailgating into buildings
- Shoulder surfing and observation
- Peer pressure and group pressure tactics
- Embarrassment and shame as manipulation
- Pressure to act quickly without thinking

SECTION 3: SCAMS & FRAUDULENT SCHEMES

Specific scam patterns—from intimate cons to industrial-scale operations

Module 11: Government Impersonation & Digital Arrest Scams

- Fake police and law enforcement calls
- **Digital arrest scams** (India-specific and global variants)
 - Fake income tax authority calls
 - Fake arrest warrants and criminal threats
 - Demands for immediate payment or verification
 - Creating panic and bypassing critical thinking
 - Using official logos and spoofed numbers
 - Escalation and isolation tactics
 - How to verify legitimate government contact
- Court and legal impersonation scams
- Recovery if you've paid money

Module 12: Family Emergency & Impersonation Scams

- Fake grandchild emergency calls
- Fake family member abductions
- Fake accidents and hospital bills
- Creating emotional urgency
- Isolation from other family members
- Demanding wire transfers
- Verification before sending money

Module 13: Tech Support & Warning Scams

- Pop-up warnings on devices (virus found!)
- Fake Apple, Microsoft, Amazon support calls
- Creating fear about your device
- Remote access to your computer

- Installing malware while helping you
- Charging for unnecessary repairs
- Getting access to your accounts

Module 14: Job, Work & Employment Scams

- Fake job offers with high pay
- Work-from-home scams
- Advance payment for job placement
- Interview and credential verification fraud
- Using your identity for employment fraud
- Check cashing and money laundering
- Legitimate vs. fake job listings

Module 15: Investment, Lottery & Prize Scams

- Fake investment opportunities
- Lottery wins you didn't enter
- Prize scams (claim your prize!)
- Forex and crypto investment scams
- Multi-level marketing (MLM) exploitation
- Advance-fee fraud for claiming prizes
- How to verify legitimate investments

Module 16: Romance, Dating & Relationship Scams

- Catfishing and fake profiles
- Building trust over weeks or months
- Romantic stories that never add up
- Isolation from friends and skeptics
- **Pig butchering** (long-term con before asking for money)
- Requests for photos or "verification"
- When to recognize the scam
- Recovery and emotional healing

Module 17: Rental, Travel & Booking Scams

- Fake rental listings and Airbnb clones
- Advance deposit for non-existent properties
- Booking site clones
- Travel agency fraud
- Hotel and airline verification fraud
- Verification before paying deposits
- Recovering lost deposits

Module 18: Banking, Payment & Account Takeover Scams

- Fake bank calls about unauthorized transactions
- Account verification and password resets

- Payment confirmation scams
- Credit card cloning
- Account takeover through social engineering
- Verifying caller legitimacy
- Immediate reporting and account freezing

Module 19: Health, Medical & Pharmaceutical Scams

- Fake prescription and medication scams
- Medical device fraud
- Health insurance and billing fraud
- Telemedicine platform scams
- Fake health apps and diagnostics
- Unlicensed practitioners
- Reporting medical fraud

Module 20: Charity, Donation & Humanitarian Scams

- Fake charities exploiting disasters
- Relief fund fraud
- Donation verification before giving
- Emotional manipulation in charity scams
- Tax deduction fraud
- Legitimate charity verification
- Reporting charity fraud

Module 21: Student & Academic Scams

- Fake scholarship offers
- Advance payment for college placement
- Fake university and degree fraud
- EdTech data harvesting and privacy violations
- AI detection tool scams (detecting plagiarism)
- Academic credential impersonation
- Reporting academic fraud

Module 22: Life-Event Targeting & Vulnerability Exploitation

- How scammers scrape public records (obituaries, birth announcements, property records)
- Targeting bereaved families
- Targeting new parents
- Targeting homebuyers and loan applicants
- Targeting divorce and separation records
- Targeting job transitions and LinkedIn announcements
- Opting out of public record targeting
- Understanding what data is publicly available

Module 23: Secondary Exploitation & Recovery Scams

- The immediate secondary threat after losing money
- Fake "ethical hackers" claiming to recover funds
- Fake lawyers offering legal recovery services
- Recovery companies asking for upfront fees
- Legitimate recovery options (chargebacks, fraud agencies)
- Red flags in any recovery offer
- Why you should not trust unsolicited recovery contacts
- Protecting yourself while grieving financial loss

Module 24: The Cybercrime Economy - Understanding Industrial-Scale Fraud

- Cybercrime-as-a-Service (CaaS) and dark web markets
- Scam compounds and fraud factories
- Division of labor in criminal organizations
- Why scams are so professional and coordinated
- Credential markets and purchased identities
- The economics of why you were targeted
- Removing shame: this is industrial, not personal failure
- Understanding the scale helps explain why "just be careful" doesn't work

SECTION 4: DECEPTIVE COMMUNICATION

How messages and content lie to you

Module 25: Phishing, Smishing & Vishing

- Email phishing and spoofed addresses
- Text message phishing (smishing)
- Voice calls pretending to be banks, support, family (vishing)
- Fake links and credential harvesting
- Urgency in messages triggering action
- QR code phishing
- How to verify sender legitimacy

Module 26: Fake Websites, Lookalike Stores & Domain Tricks

- Domain names that mimic real companies
- Fake checkout pages
- Lookalike apps on app stores
- Website cloning
- SSL certificates on fake sites (lock icon = trust)
- Typosquatting and similar URLs
- Verifying URL legitimacy before entering data

Module 27: Quishing & Physical-Digital Attack Convergence

- QR codes as attack vectors
- Fake QR codes on parking meters
- Malicious QR codes on restaurant tables
- Fake QR codes on EV charging stations
- QR codes on public transportation and stickers
- Creating suspicion of unsolicited QR codes
- How to safely scan QR codes
- When physical spaces become attack surfaces

Module 28: Fake Content, Deepfakes & AI Deception

- Deepfake videos of people saying things they didn't
- AI-generated audio impersonation
- Synthetic faces and synthetic people
- Fake images created by AI
- Fake documents and forged PDFs
- Using deepfakes in fraud, blackmail, harassment
- Spotting AI-generated content
- When deepfakes are used against you

Module 29: Misinformation, Disinformation & Propaganda

- False news vs. misleading news vs. opinion
- Emotional content spreads faster than truth
- Propaganda techniques and emotional triggers
- Coordinated disinformation campaigns
- Troll farms and inauthentic behavior
- Astroturfing (fake grassroots movements)
- Before sharing — what makes you want to share?

Module 30: False Claims, Fake Credentials & Impersonation Online

- Fake job titles and fake credentials
- Impersonating doctors, lawyers, financial advisors
- Fake certifications and fake expertise
- Spoofed caller ID and caller authentication
- Verification badges and how they're bypassed
- When professionals are actually con artists

SECTION 5: AI BIAS & ALGORITHMIC INFLUENCE

How AI systems manipulate and mislead you

Module 31: AI-Generated Content & Synthetic Media

- AI-generated text and chatbot deception
- AI writing that sounds human but is hollow

- Language model hallucinations (made-up facts)
- Synthetic images and deepfakes
- AI art and copyright issues
- Detecting AI-generated content
- AI personas and relationships that aren't real

Module 32: Algorithmic Bias & Invisible Discrimination

- Bias in AI hiring, lending, insurance decisions
- Algorithmic discrimination without intent
- Training data bias creating unfair outcomes
- Opacity: you don't know why you were rejected
- Historical bias in machine learning
- Who gets shown what content (and why)
- Fighting algorithmic discrimination

Module 33: Confirmation Bias & Filter Bubbles (AI-Amplified)

- Algorithms showing you what agrees with you
- Filter bubbles isolating you in belief communities
- Algorithmic echo chambers and polarization
- Reinforcing beliefs you already hold
- Missing contrary information entirely
- Political and social polarization by design
- Breaking out of algorithmic bubbles

Module 34: Persuasion, Manipulation & AI at Scale

- AI optimizing persuasion messages for you
- A/B testing manipulation on millions of people
- Predicting vulnerability and targeting it
- Emotional triggers identified by algorithms
- AI learning what manipulates you best
- Personalized persuasion vs. mass propaganda
- When AI knows you better than you know yourself

Module 35: AI Hallucinations & False Confidence

- AI making up facts with confidence
- Plausible-sounding but false information
- AI's tendency to agree with you
- Using AI for research and getting false answers
- Trusting AI experts who don't exist
- Medical, legal, and financial advice from AI
- When AI confidently lies

SECTION 6: DARK PATTERNS & MANIPULATIVE DESIGN

How apps and websites trick you into giving away data and money

Module 36: Consent Manipulation & Privacy Tricks

- Trick questions and confusing language
- Confirm shaming (saying "Yes" is easy, "No" is hard)
- Cookie dark patterns and consent walls
- Opt-in vs. opt-out confusion
- Unsubscribe traps and buried cancellation
- Pre-checked boxes for unwanted things
- Location and permission requests at vulnerable moments

Module 37: Subscription Traps & Hidden Charges

- Free trial with automatic billing
- Roach motel (easy to get in, hard to leave)
- Recurring charges hidden in fine print
- Cancellation that requires calling or multiple steps
- Free + premium tiers that are confusing
- Unexpected charges from partnerships
- Billing language that obscures the cost

Module 38: Manufactured Urgency & Artificial Scarcity

- Countdown timers (only 5 items left!)
- Fake inventory ("Only 2 left in stock")
- Flash sales and artificial deadlines
- Flashing "Buy Now" buttons
- Limited edition and exclusive claims
- Social pressure (others are buying it)
- Price anchoring and fake discounts

Module 39: Gamification, Streaks & Compulsion Loops

- Daily streaks (lose it if you skip one day)
- Variable rewards (sometimes good, sometimes not—like slot machines)
- Notifications timed to trigger FOMO
- Badges, points, and fake achievements
- Leaderboards and social comparison
- Leveling systems that require constant engagement
- Designed addiction mechanics

Module 40: Infinite Scroll, Autoplay & Stopping Points

- Infinite scroll (no natural ending point)
- Autoplay that prevents pausing
- Videos that auto-start with sound
- Recommendation algorithms that never stop
- Removal of time indicators ("how much time have I spent?")
- Notification pile-up preventing breaks
- Psychological addiction by design

Module 41: Distraction, Misdirection & Obfuscation

- Cluttered interfaces hiding important options
- Bait and switch (you click for X, get sent to Y)
- Hidden privacy settings buried in menus
- Important warnings disguised as normal text
- Confusing button placement and labeling
- Multiple steps to do simple things
- Intentional complexity

Module 42: Nudging, Defaults & Assumption Abuse

- Opt-out instead of opt-in (assuming yes)
- Pre-selected options you don't notice
- Default settings that expose you
- Suggested purchases and auto-added items
- Defaulting to sharing data with third parties
- Assuming consent if you don't actively refuse
- Powerful defaults hidden in assumptions

Module 43: Social Proof, Fake Reviews & Manufactured Credibility

- Fake reviews and ratings
- Fake user testimonials
- Fake influencer endorsements
- Bot comments and bot engagement
- Hiding negative reviews
- Paid reviews disguised as organic
- Fake verification and trust badges

Module 44: Emotional & Psychological Manipulation in Design

- Using shame or embarrassment
- FOMO (fear of missing out) triggers
- Loss aversion (afraid to lose what you have)
- Ego depletion (tired decision-making)
- Dopamine hits from notifications
- Color psychology and visual manipulation
- Sound design and haptic feedback designed to addict

Module 45: Financial Gamification & BNPL Shadow Debt

- Buy Now, Pay Later (BNPL) apps and hidden debt
- How BNPL exploits behavioral finance
- Multiple BNPL installments accumulating invisibly
- High-risk trading app gamification (Robinhood culture)
- Micro-investing apps designed for addiction
- Stock trading as gamified gambling
- Interest rates and fees hidden in BNPL terms
- When "easy payments" become debt traps

SECTION 7: SURVEILLANCE & PRIVACY THEFT

How your data is harvested without real consent

Module 46: Tracking Technologies & Data Collection

- Cookies, pixels, and behavioral tracking
- Cross-device tracking
- Location tracking and geofencing
- Listening devices and always-on microphones
- Metadata revealing more than content
- Fingerprinting (identifying you without cookies)
- Connection between purchases and digital behavior

Module 47: Behavioral Profiling & Advertising Manipulation

- Data brokers building profiles of you
- Psychographic targeting (targeting beliefs, not just interests)
- Microtargeting and hyper-personalized ads
- Emotional targeting based on mood analysis
- Predictive behavior and what you might do
- Targeted ads after speaking aloud
- Ad networks following you across the internet

Module 48: Social Media Data & Algorithmic Manipulation

- What social media platforms collect and how
- Engagement metrics designed to profile you
- Algorithmic feeds showing content that triggers you
- Filter bubbles and echo chambers
- Amplification of divisive content
- Targeting based on private messages
- Shadowbanning and algorithmic suppression

Module 49: Government & Corporate Surveillance

- Government surveillance and data access
- Facial recognition in public spaces

- Cell tower data and location tracking
- Police access to social media and personal data
- Corporate data sharing with governments
- Your data used in predictive policing
- Digital rights violations and surveillance chilling effect

Module 50: Intimate Surveillance & Stalking Technology

- Spyware and stalkerware on devices
- Location sharing and tracking by partners
- Password sharing and account access
- Financial control through monitoring
- Messages, calls, and contacts being monitored
- Abuse and coercive control
- Getting help when being digitally surveilled

Module 51: Defensive OSINT - Auditing Your Own Digital Footprint

- What information is publicly available about you
- Reverse image searching your own photos
- Using HaveIBeenPwned to check breach exposure
- Google Alerts for monitoring your name
- Checking property records and public databases
- Understanding your digital shadow
- Taking down leaked information
- Shifting from passive (being tracked) to active (auditing yourself)
- Tools and methods for personal OSINT
- Knowing what's exposed so you can protect it

SECTION 8: FINANCIAL & ECONOMIC EXPLOITATION

How money is taken or how you're exploited for profit

Module 52: Payment Fraud & Unauthorized Charges

- Credit card fraud and cloned cards
- Payment app fraud and transfers
- Unauthorized recurring charges
- Wire transfer fraud (can't be reversed)
- Refund fraud (claiming you didn't receive something)
- Chargeback fraud (from the victim's perspective)
- Account verification before large transfers

Module 53: SIM Swap, Account Takeover & Identity Exploitation

- SIM swap attacks (taking over your phone number)
- Two-factor authentication bypass
- Taking over email to reset passwords
- Draining bank and crypto accounts
- Using your identity for loans or credit
- Selling stolen credentials on dark web
- Recovery when accounts are fully compromised

Module 54: Cryptocurrency Theft & Blockchain Fraud

- Fake exchanges and wallets
- Private key theft and compromised wallets
- Rug pulls (projects that disappear with your money)
- Smart contract exploits
- Phishing targeting crypto holders
- Pump-and-dump in crypto
- When crypto is stolen—recovery is usually impossible

Module 55: How Companies Monetize Your Addiction

- Attention economy and your focus as product
- Time on platform = revenue model
- Dark patterns designed specifically for engagement
- A/B testing manipulation tactics on you
- Selling your attention to advertisers
- Extracting maximum engagement regardless of harm
- Knowing you're the product, not the customer

SECTION 9: HARASSMENT, ABUSE & HARM

Attacks targeting your safety, reputation, and wellbeing

Module 56: Cyberbullying, Harassment & Coordinated Attacks

- Targeted harassment and pile-on attacks
- Hate campaigns and coordinated trolling
- Swatting (fake emergency calls to your address)
- Doxxing (publishing your personal information)
- Coordinated campaigns across platforms
- When harassment turns into threats
- Reporting and legal recourse

Module 57: Stalking & Surveillance by Known People

- Digital stalking and obsessive monitoring
- Location tracking and device surveillance
- Monitoring communications and activities

- Creating fear through knowledge
- Escalation from digital to physical threat
- Intimate partner violence and digital control
- Evidence for protective orders and law enforcement

Module 58: Sexual Abuse, Sextortion & Image-Based Abuse

- Revenge porn and intimate image sharing
- Sextortion (threatening to share unless you pay)
- Non-consensual deepfake pornography
- Solicitation and grooming
- Harassment targeting gender and sexuality
- LGBTQ+ specific targeting and outing
- Legal recourse and support

Module 59: Child Exploitation & Grooming

- Adult predators building relationships with children
- Normalized behavior escalating to abuse
- Solicitation of images and videos
- Isolation from protective adults
- Manipulation and grooming tactics
- Child sexual abuse material (CSAM)
- Reporting to law enforcement and support for victims

Module 60: Reputational Damage & Social Destruction

- False accusations and reputation attacks
- Leaked private conversations
- Old posts and comments resurface
- Career sabotage through social media
- Educational/professional opportunities lost
- Permanent digital record
- Recovering reputation and moving forward

SECTION 10: PSYCHOLOGICAL & BEHAVIORAL MANIPULATION

How systems exploit how humans think and behave

Module 61: Cognitive Biases & Decision-Making Exploitation

- Confirmation bias (seeing what you want to see)
- Availability bias (recent events feel more important)
- Optimism bias (bad things won't happen to me)
- Authority bias (trusting officials)

- Sunk cost fallacy (justifying losses)
- Anchoring bias (first number sticks in your mind)
- Being exploited through your own thinking patterns

Module 62: FOMO, Status Anxiety & Social Comparison

- Manufactured FOMO on social media
- Comparing yourself to curated versions
- Status anxiety and keeping up
- Envy and dissatisfaction by design
- Artificial metrics of success
- Spending money to maintain image
- Mental health impact of constant comparison

Module 63: Stress, Decision Fatigue & Vulnerability

- Decision fatigue making you less careful
- Stress increasing susceptibility to scams
- Attention narrowing when stressed
- Multitasking reducing security awareness
- Cognitive overload preventing detection
- Emotional distress increasing vulnerability
- When you're most at risk

Module 64: Addiction & Compulsive Behavior

- Dopamine and reward cycle exploitation
- Variable rewards (slot machine effect)
- Withdrawal when not using app
- Tolerance (needing more engagement)
- Loss of control and compulsive use
- Impact on sleep, relationships, work
- When to recognize addiction and seek help

Module 65: Normalized Behavior & Gradual Boundary Erosion

- Slowly normalizing worse behavior
- Each step seeming reasonable
- Boiling frog scenario (gradual change)
- Habituation to surveillance and manipulation
- Normalizing data sharing and privacy loss
- Changing what feels "normal" and acceptable
- Recognizing incremental erosion of safety

SECTION 11: SPECIALIZED THREATS & VULNERABLE GROUPS

High-risk situations and specific vulnerabilities

Module 66: Vulnerable Groups & Targeted Exploitation

- Seniors targeted for specific scams
- Children with less skepticism
- Immigrants facing language and legal status vulnerabilities
- People with mental health conditions
- Marginalized groups facing harassment
- Disabled people exploited for care
- Those in crisis making poor decisions

Module 67: Gaming & Online Community Exploitation

- Account hijacking and item theft
- In-game predators and grooming
- Fake trades and item scams
- Toxic communities and normalized abuse
- Streaming risks and doxxing
- Predatory spending mechanics
- Gaming as targeting ground for recruitment to crime

Module 68: Dating Apps & Romantic Spaces

- Catfishing and fake profiles
- Romance scams and emotional manipulation
- Verification bypasses and fake verification
- Data collection in intimate moments
- Safety in meeting people from apps
- Predators on dating platforms
- Consent and sexual coercion

Module 69: Health Tech, Medical Data & Wearables

- Health app fraud and medical device exploitation
- Fitness tracker data misuse and insurance discrimination
- Mental health app data harvesting
- Genetic testing data leaks and family exposure
- Telemedicine platform vulnerabilities
- Medical identity theft
- Reporting health data breaches

Module 70: Connected Vehicles, EVs & Transportation Hacking

- EV charging data and location tracking
- Dashcam and telemetry data exposure
- Autonomous vehicle hacking and hijacking
- Location history from connected cars

- Ride-sharing app vulnerabilities
- GPS spoofing and tracking
- Physical danger from vehicle compromise

Module 71: Smart Home, IoT & Domestic Surveillance

- Smart speakers and always-on listening
- Smart TVs and data collection
- Smart locks, cameras, and doorbells
- Baby monitors and domestic surveillance
- Home automation vulnerabilities
- Stolen unlocked phones unlocking smart homes
- Domestic violence and smart home abuse
- Securing your home devices

Module 72: Workplace & Gig Economy Threats

- Business Email Compromise (BEC) and CEO fraud
- Vendor payment scams and wire transfer fraud
- Invoice fraud and fake W-2s
- Freelancer and contractor targeting
- Gig worker account takeover (Uber, Lyft, DoorDash)
- Content creator impersonation and account hijacking
- Remote worker and home office vulnerabilities
- Protecting your livelihood as a worker

Module 73: High-Risk & Activist Contexts

- Surveillance targeting journalists and activists
- Spyware and state-sponsored hacking
- Physical danger from digital exposure
- Border security and device search
- Censorship and internet shutdown
- De-platforming and digital erasure
- Protective measures for high-risk users

Module 74: Cryptocurrency & Web3 Exploitation

- Fake coins and rug pulls
- Wallet drain and seed phrase theft
- Smart contract exploits and flash loans
- DeFi yield farming and hidden risks
- NFT fraud and theft
- Pressure to buy before understanding
- Irreversible transactions and no recovery

SECTION 12: WHEN IT HAPPENS TO YOU

Module 75: Account Compromised or Hacked

- Immediate actions to stop ongoing access
- Assessing what the attacker can see
- Securing other accounts with same password
- Notifying services and reversing changes
- Rebuilding authentication and recovery options
- Monitoring for future unauthorized access
- Psychological impact and next steps

Module 76: Money Stolen or Lost to Scam

- First 24 hours: banks, payment companies, police
- Legitimate recovery options (chargebacks, reversals)
- When recovery is not possible
- Credit monitoring and fraud alerts
- Understanding liability and protection
- Preventing the same scam again
- Emotional response and moving forward

Module 77: Intimate Images Shared or Deepfake Created

- Immediate reporting and takedown requests
- Law enforcement and legal options
- Supporting yourself emotionally
- Managing ongoing harassment
- Long-term recovery and reframing
- Preventing further sharing
- When visibility and silence are both hard

Module 78: Harassed, Stalked or Threatened

- Documenting everything thoroughly
- Platform reporting and escalation
- Police reports and investigations
- Protective orders and legal action
- Digital safety planning
- Physical safety planning
- Mental health support and healing

Module 79: Identity Stolen or Impersonated

- Credit freeze and monitoring
- Fraud reports and investigation
- Reclaiming accounts and reputation
- Legal recourse and civil action

- Long-term identity restoration
- Removing the fake online presence
- Preventing future identity theft

Module 80: Child Groomed, Exploited or Victimized

- Immediate safety and support for child
- Reporting to platform and law enforcement
- Evidence preservation
- Professional counseling and support
- Legal prosecution of offender
- Monitoring and preventing future abuse
- Rebuilding trust and safety with child

Module 81: Living With Digital Aftermath

- Understanding trauma from digital violence
- Recovery from financial exploitation
- Rebuilding trust in people and platforms
- Creating new security practices
- Supporting loved ones who experienced it
- When professional help is needed
- Turning survival into resilience

Module 82: Digital Estate & Post-Mortem Exploitation

- How scammers scrape obituaries and target bereaved families
- Protecting a deceased person's identity
- Legacy contacts and account memorialization
- Freezing credit after death
- Power of attorney and digital executor roles
- Preventing identity theft of the deceased
- Supporting family after digital exploitation
- Creating a digital will and legacy plan

SECTION 13: COUNTRY-SPECIFIC THREATS, SCAMS & RESOURCES

Localized risks and help based on where you live

Module 83: India - Specific Scams & Legal Context

- **Digital arrest scams** (expanded coverage)
 - Income tax authority impersonation
 - Police arrest warrant threats
 - Aadhar and PAN verification scams

- Fake government WhatsApp groups
- UPI and mobile banking targeting
- **Indian-specific romance scams**
 - Matrimonial site fraud
 - Dowry and marriage scams
- **Banking and payment fraud in India**
 - UPI fraud and fake payment requests
 - Bank deposit scams
 - Loan app predatory practices
- **Telecom and mobile fraud**
 - SIM swap targeting Aadhaar
 - Telecom impersonation
- **Indian cybercrime laws and reporting**
 - IPC Section 66 and IT Act 2000
 - Cyber Crime Cell reporting
 - State-specific cyber crime wings
 - Cybercrime helplines and support organizations

Module 84: United States & North America - Specific Scams & Legal Context

- **IRS and tax fraud scams**
 - Social Security impersonation
 - Tax refund fraud
- **Healthcare and insurance fraud**
 - Medicare and Medicaid scams
 - Insurance claim fraud
- **Banking-specific threats**
 - ACH fraud and wire transfer scams
 - Credit reporting agency impersonation
- **US cybercrime laws and resources**
 - FBI IC3 reporting
 - FTC and state attorney generals
 - State-specific cybercrime laws

Module 85: Europe - Specific Scams & Legal Context

- **GDPR and European privacy context**
 - Data protection violations
 - Cross-border enforcement
- **European payment systems fraud**
 - SEPA fraud
 - Regional payment app scams
- **European-specific scams**
 - Holiday and travel fraud (regional)
 - Energy crisis and utility scams
- **European cybercrime resources**
 - Europol reporting

- National cybercrime centers by country
- GDPR violation reporting

Module 86: Southeast Asia - Specific Scams & Legal Context

- **Mobile-first fraud (high SMS/WhatsApp usage)**
 - Fake mobile money transfers
 - SIM swap attacks
- **Regional romance and relationship fraud**
 - Cross-border romance scams
 - Mail-order scams
- **Southeast Asia cybercrime resources**
 - Country-specific police cybercrime units
 - Regional reporting mechanisms
 - Fraud prevention in each country

IMPLEMENTATION NOTES

SOP: Module Structure & MDX Guidelines (The 6-Step Flow)

To maintain consistency across the platform, every module MDX file **MUST** strictly follow this exact 6-step architecture:

1. **[Story] The Hook:** Begin with a short, relatable narrative or scenario (1-2 paragraphs) explaining the core concept in plain language without technical jargon.
2. **[Facts] The Grounding:** Provide 3-4 bullet points of real-world data, financial loss statistics, or historical context to prove the threat is real.
3. **[Interactive] The Engagement:** Insert the interactive component (e.g., a simulated phishing email, a dark pattern UI toggle, or an OSINT tool embed).
4. **[Unpack] The Analysis:** Explain *how* the interactive example just worked. This section **MUST** include the **Threat Taxonomy Block**:
 - **Vector:** *How is this attack delivered? (e.g., SMS, Social Media, Physical QR)*
 - **Motivation:** *What does the attacker want? (e.g., Financial, Data Harvesting)*
 - **Vulnerability:** *What psychological lever is pulled? (e.g., Authority Bias, FOMO, Panic)*
 - **Target:** *Who is most likely to fall for this? (e.g., Gig Workers, Elderly, General)*
5. **[Action] The Application:** Provide a highly actionable, 3-to-5 step bulleted checklist of what the user should do right now to protect themselves or recover.

6. [Pause] The Assessment: Conclude with 1 to 3 Multiple Choice Questions (MCQs) to test knowledge retention before the user moves to the next module.

Note: Enable Content Cross-References - Link related modules for deeper understanding

Next Phase:

Playbooks (Printable 1-Page Checklists)
